

## DR FRANCK BAUDINO

FOUNDER & MEDICAL DIRECTOR  
SAINT-BARTH LONGEVITY

*A visionary approach to longevity and integrative medicine*

Founder of Saint-Barth Longevity, Dr. Franck Baudino envisioned the world's first "clinic without walls", an innovative concept of regenerative well-being, rooted in Saint Barthélémy and connected to leading international specialists. His vision brings together Western precision medicine, traditional healing wisdom, and cutting-edge technologies to design fully personalized longevity programs. Through exclusive protocols — combining advanced health assessments, regenerative therapies, and Signature retreats — Saint-Barth Longevity offers a unique experience of renewal and balance.

*An international medical career*

Dr. Baudino began his career as an emergency physician before becoming Embassy Doctor for France and Germany in India, where he built an innovative medical emergency network. His international assignments in India, Vietnam, Gabon, and Brazil allowed him to explore diverse medical traditions — from Ayurveda to African ancestral practices — shaping his global and deeply humanistic vision of health.

*A pioneer in medical innovation*

A recognized pioneer in telemedicine, Dr. Baudino founded HaD in 2008 and created the Consult Station®, the first connected medical office deployed in over 10 countries. This innovation, awarded the Galien Prize and the World Innovation Competition, revolutionized access to healthcare — from rural communities to multinational corporations.

Building on this expertise, he later launched Baudicare, a luxury medical concierge service, offering bespoke health evaluations and privileged access to top-tier specialists worldwide.

*Redefining longevity today*

Through Saint-Barth Longevity, Dr. Baudino continues to shape the future of preventive and integrative medicine, bridging medical excellence, hospitality sophistication, and human-centered care.

*"I created a clinic without walls, where science meets Saint-Barth for a personalized longevity experience."*
